Why a CIB webinar series?
Purpose of this webinar on gender equality

The webinar aims to provide an opportunity for CIB members (i.e. organisations involved in capacity development with local governments worldwide) to share experience and good practices to advance gender equality at the local level, both ‘at home’ and in international cooperation programs.
Learning objectives of this webinar

1) Promote a shared understanding within CIB members of SDGs (and SDG 5 in particular), and related New Urban Agenda, and Right to the City agenda;

2) Help CIB members understand how 3 organizations (i.e. presenters) are assessing and responding to the context and needs of gender equality with specific policies, strategies or plans;

3) Provide specific methodology/tools or good practices (ONE tool or practice per presenter only) used in capacity development projects.
Positioning SDG 5

• Local governments can act as a model for gender equality and the empowerment of women through non-discriminatory service provision to citizens and fair employment practices
• Local governments are on the frontline of identifying and tackling violence and harmful practices against women.
• Regional and governments and rural municipalities can identify and tackle barriers to women’s equal access to land control and ownership
• Getting more women into elected office at local level is a top priority in terms of empowering women

→ How to integrate this in our programmes and in our own organizations?

METROPOLIS

Metropolis is the global network of major cities and metropolitan areas.

Metropolitan governments or structures created expressly to deal with metropolitan challenges.

Municipalities of the largest cities of the world which voluntarily cooperate within their metropolitan territories.

Sectoral metropolitan agencies which manage and/or plan one or various services, such as public transport, the environment, the police, etc.

Counties, provinces, regions and other jurisdictions which carry out metropolitan policies.
Public spaces are gendered

Breakthroughs and Challenges

Breakthroughs

- Improvement in the approach to structural causes of Rights violations and inequality: more transformation

- Interrelation and interdependency of Rights: intersectional and holistic approach with better coordination of actors and promotion of networks

- Women: Rights holders and no longer passive subjects
Breakthroughs and Challenges

Challenges

- A more direct support and empowerment mechanisms to grassroots women’s movements must be promoted: Women’s Funds

- Improving follow-up and evaluation mechanisms in a participatory way: to analyse results, impacts, lessons learned and inclusion in future plans with Rights Holders

- Complex global and Catalan political context to guarantee the continuity of breakthroughs achieved in Women’s Human Rights

Building Inclusive Communities Through Economic Opportunities

Elena Pierce
Governance, Policy and Networks Advisor
Federation of Canadian Municipalities (FCM).

April 12, 2018
Overview of the Presentation

• Gender Equality and Women’s Empowerment
• Canada & Gender Equality
• FCM’s Local Economic Development Programming
• Promoting Gender Equality in LED Internationally
Gender Equality and Women’s Empowerment

- Gender equality means that one’s rights and opportunities do not depend on being a male or a female.

- Equality between women and men is the most essential condition for poverty reduction, safety and prosperity around the world (which are the purposes of international assistance).

- With equal opportunities and status, women and girls are powerful agents of change in their lives, families, communities and countries.
Canada & Gender Equality

- Gender equality is enshrined in the Canadian Charter of Rights and Freedoms (section 15.2 in effect in 1985). Women’s movements have influenced employment equity, daycare, anti-violence, ending poverty, representation, etc.
- Ministerial position responsible for the Status of Women at federal level, and every province has a Minister responsible for the status of women.
- Internationally: Canada’s long standing reputation as a leader on Gender Equality.
- Liberal government stresses Gender Equality as a priority throughout government and was inspired by Sweden’s “Feminist foreign policy”.
- “Feminist approach”: addresses marginalization and imbalance in power and status (of women and girls compared to men and boys), and considers other factors increasing inequality (disabilities, age, ethnicity, etc.).
FCM’s Local Economic Development (LED) Programming

FCM has been implementing programming focused on economic development with an aim of improving gender equality for close to 10 years. Sample Knowledge Products:

- The Evolution of Local Economic Development in Canada
- Building Community Prosperity Through Local Economic Development – An Introduction to LED Principles and Practices
- Creating a Strategic Plan for Local Economic Development
- Innovation Fund and Small Fund Models (PLEDDG, PMI, CISAL)
- Case Study: Supporting Women’s Economic Empowerment
- Case Study: Is There A Need to Support Women Entrepreneurs?

See FCM’s Knowledge Toolbox:
Promoting Gender Equality in LED Internationally

Successful LED initiatives are participatory and inclusive, guided by local leadership, and geared at job creation or expansion, enhanced community competitiveness and investments and increased economic growth that is also sustainable.

• In your LED work, do you address the different needs of men and women, who are the beneficiaries, and do they both participate equally as active agents of local economies?

• What are the priority policies and strategies for expanding decent work opportunities for women, youth, migrants, and groups in a situation of social and economic exclusion in the public and private sectors?

• How are gender equality bodies and women’s organizations involved in local consensus-building processes, for example, in territorial pacts in order to directly promote gender mainstreaming in local economic development initiatives?

• Are there gender equal LED regulatory frameworks at the national level? How are they applied at the local level? Are there policies or plans to develop gender equality policies in LED in the public and private sector?

• To what extent can existing institutions provide the financial and business development services needed by women, in addition to the market segments where they could have a competitive advantage?
Promoting Gender Equality in LED Internationally (cont’d)

• Local Government Associations
  – ACOBOL (Asociación de Concejalas de Bolivia)
    • Publication on Strengthening LED for Women in Local Governments
  – CISAL’s Network of Women Mayors
    • Annual meetings; discuss issues linked to the extractive sector in Colombia as well as economic development

• Women’s Networks (examples):
  – DELGEN (Igualdad de Género en los Territorios) in Latin America
  – Commonwealth Local Government Forum (CLGF) Women’s Network

• Global Committees
  – UCLG’s Local Economic and Social Development
    • Policy on Local Economic Development; knowledge development on the gender economy
